FERNANDO DORANTES MONSIVÁIS
SOFTWARE ENGINEER

Mexico City, Mexico

I bring **13 years** of software development experience with a **passion** for **creating products**, **microservices**, and **ecosystems** that positively **impact society**, **enabling people** to **enhance** their **quality** of **life** and **financial well-being**.

I enjoy **writing open source** and **contributing** to the professional **growth of other developers**.

💼 PROFESSIONAL EXPERIENCE

2023 🟢 **99 minutos**

Software Engineer
I made **enhancements** within the Staff Microservice. I implemented a **hexagonal architecture**, conducted **stress tests**, and **migrated** several endpoints from NodeJS **to Golang** for **improved efficiency** and **scalability**.

2022 **Rabbit**

Backend Engineer
I **improved** the **customer validation flow**, **cached reports** and **enabled the sale of surplus products** on delivery routes. This led to a **reduction in warehouse returns**, an **increase** in **commissions**, and the **prevention of sales to non-target customers**.

2020 / 2022 **Yaydoo**

Staff Software Engineer
I guied the development of microservices for **webhooks** and **billing** SAT inbox **events**. I also **automated tests** using **CLI scripts**, which **increased efficiency** and **decreased development costs to $0**.

Technical leader
I coordinated the **launch of MVPs** such as **Vendorplace**, **Checkout**, **Engage** and **Connect**. I **managed multiple teams, supporting** the **individual and collective growth** of **developers**. Additionally, I **conducted technical interviews** as part of the hiring processes.

2018 / 2019 **Merengue Merengue**

Full Stack Developer
I **enhanced** the **user experience** in a **geolocated** desserts **marketplace**. I **refined** the delivery **algorithm**, **reducing losses**. After the company's closure, I **migrated** from Laravel to **Express** and **turned** it **into** a **white-label** app **allowing to be sold** as product by the partners.

2017 **Yapp**

Backend Developer
I **added support** for **multiple cities** through geofences, I **migrated** from Laravel to Express, and **improved performance of ride finding flow**. This **expanded** the **company's concessions** sales **to new cities** in Mexico, **driving growth** and **market reach**.

🚀 TECHNOLOGIES ✨Stack

`Javascript` `Typescript` `PHP` `GO` `HTML` `CSS` `Java`
